Abstract of JP6318387

PURPOSE: To shorten an average access time of a disk type recording medium such as a mini-disk(MD).

CONSTITUTION: A file directory is recorded near the center in this disk type recording medium. This device is provided with a recording means (for example, optical pickup 806 and magnetic head 808) which records data in a disk type recording medium and a control means (for example, system control CPU 820) which controls the recording means so that a file directory is recorded near the center of the disk type recording medium.
